

MC000 · Builder Basics

Minecraft · Code Builder — Move the agent, then build a bridge, house, well, and village.

For parents: these are the key English coding words your child meets in this course, week by week. You don't need to code — just read a word together and ask your child to explain it back in their own words. The tiny example shows what it looks like in real code.

W1

WORD	WHAT IT MEANS	TINY EXAMPLE
agent	the robot helper your code controls	<pre>agent.move(FORWARD, 1)</pre>
on_chat	run code when you type a chat word	<pre>player.on_chat("go", run)</pre>
agent.move	move the agent one block in a direction	<pre>agent.move(FORWARD, 1)</pre>
direction	FORWARD / BACK / LEFT / RIGHT / UP / DOWN	<pre>agent.move(LEFT, 2)</pre>
agent.turn	rotate the agent left or right	<pre>agent.turn(RIGHT)</pre>

W2

WORD	WHAT IT MEANS	TINY EXAMPLE
agent.place	put down the block the agent holds	<pre>agent.place(DOWN)</pre>
block type	which block to use (GRASS, STONE...)	<pre>agent.set_item(STONE, 1, 1)</pre>
agent slot	the inventory box the agent builds from	<pre>agent.set_slot(1)</pre>

W3

WORD	WHAT IT MEANS	TINY EXAMPLE
sequence	steps that run in order, top to bottom	<pre>move(); place(); move()</pre>
loop	repeat steps without retyping them	<pre>for i in range(5):</pre>
range()	how many times the loop repeats	<pre>range(5) # 0..4</pre>

W4

WORD	WHAT IT MEANS	TINY EXAMPLE
four sides	turn 90° four times to make a square	<pre>for i in range(4): wall()</pre>
wall	a line of blocks built with a loop	<pre>for i in range(6): agent.place(DOWN)</pre>

W5

WORD	WHAT IT MEANS	TINY EXAMPLE
layer	one flat level of the build	<code>build_layer()</code>
UP / height	stack layers to add height	<code>agent.move(UP, 1)</code>

W6

WORD	WHAT IT MEANS	TINY EXAMPLE
dig DOWN	destroy/clear blocks downward	<code>agent.destroy(DOWN)</code>
depth	how many blocks deep you go	<code>for i in range(4): dig()</code>

W7

WORD	WHAT IT MEANS	TINY EXAMPLE
grid	rows and columns of blocks	<code>for r in range(5): for c in range(5):</code>

W8

WORD	WHAT IT MEANS	TINY EXAMPLE
function	a named, reusable set of build steps	<code>def build_house():</code>
coordinates	an (x, y, z) spot in the world	<code>blocks.place(OAK, world(0,0,0))</code>
reuse	call the same function many times	<code>build_house(); build_house()</code>
