

WEB002 · JavaScript

Web Development — Bring pages to life with code.

For parents: these are the key English coding words your child meets in this course, week by week. You don't need to code — just read a word together and ask your child to explain it back in their own words. The tiny example shows what it looks like in real code.

W1

WORD	WHAT IT MEANS	TINY EXAMPLE
<code>console.log</code>	print a message to the browser console	<pre>console.log("hi")</pre>
<code>script tag</code>	<code><script>...</script></code> — runs JS in HTML	<pre><script>alert(1)</script></pre>
<code>statement</code>	one instruction ending with a semicolon	<pre>let x = 5;</pre>

W2

WORD	WHAT IT MEANS	TINY EXAMPLE
<code>let / const</code>	declare a variable (const can't change)	<pre>const name = "Sam";</pre>
<code>DOM</code>	the tree of elements built from the HTML	<pre>document.body</pre>
<code>querySelector</code>	find one element by CSS selector	<pre>document.querySelector("#title")</pre>
<code>textContent</code>	the text inside an element	<pre>el.textContent = "New!"</pre>

W3

WORD	WHAT IT MEANS	TINY EXAMPLE
<code>event</code>	something that happens (click, keypress)	<pre>"click"</pre>
<code>addEventListener</code>	run a function when an event fires	<pre>btn.addEventListener("click", go)</pre>
<code>callback</code>	the function passed in to run later	<pre>setTimeout(go, 1000)</pre>

W4

WORD	WHAT IT MEANS	TINY EXAMPLE
<code>input element</code>	<code><input></code> tag the user types into	<pre><input id="name"></pre>
<code>.value</code>	the current text in an input field	<pre>input.value</pre>
<code>submit</code>	the action of sending a form	<pre>form.addEventListener("submit", ...)</pre>

W5

WORD	WHAT IT MEANS	TINY EXAMPLE
if / else if / else	a three-way branch on a condition	<pre>if (x > 0) { ... } else { ... }</pre>
=== / !==	strict equal / strict not equal	<pre>5 === "5" // false</pre>
boolean	a value that is either true or false	<pre>let done = true;</pre>

W6

WORD	WHAT IT MEANS	TINY EXAMPLE
array	an ordered list of values in []	<pre>let nums = [1, 2, 3];</pre>
for loop	repeat code a fixed number of times	<pre>for (let i=0; i<3; i++) {}</pre>
.forEach	run a function once per array item	<pre>nums.forEach(n => console.log(n))</pre>

W7

WORD	WHAT IT MEANS	TINY EXAMPLE
function	a reusable block of code	<pre>function greet() { ... }</pre>
parameter	an input the function expects	<pre>function greet(name) { ... }</pre>
return	the value the function gives back	<pre>return total;</pre>
arrow function	short syntax: () => { ... }	<pre>const add = (a,b) => a+b;</pre>

W8

WORD	WHAT IT MEANS	TINY EXAMPLE
state	the data describing what's on screen now	<pre>let score = 0;</pre>
render	update the DOM to match the state	<pre>el.textContent = score;</pre>
event-driven	code that reacts to user actions	<pre>on click → update</pre>
